

Seal Replacement Kit

When seal replacement is required, Cornell Pump Company recommends purchasing an entire seal replacement kit. The seal replacement kit provides the end user with all the necessary replacement components recommended within the proper seal replacement procedures.

Seal Kits include a mechanical seal assembly, pumping ring, shaft sleeve, pump o-ring kit, impeller screw, impeller washer, and oil reservoir o-rings. In addition, a video illustrating proper maintenance procedures can be acquired from Cornell Pump Company at (503) 653-0330.
