

CORNELL PUMP NEW WAREHOUSE - BAYTOWN TX

Cornell Pump Company has established a 3PL warehouse in Baytown, Texas, to enhance customer support and satisfaction for its expanding rental market. This strategic move allows for faster delivery, with same-day and next-day options available, effectively reducing delivery times by 3-4 days compared to shipments from Clackamas, Oregon. In addition to speed, the facility offers round-the-clock customer support, available 24/7/365, ensuring that clients receive assistance whenever needed. The warehouse will stock essential items such as assembled frame kits, seal kits, loaded shafts, and stock pumps, which will be available at a determined time. Moreover, customers will have access to genuine Cornell parts and warranties, eliminating the need for pirated parts from third-party companies.
